Kartik Jakhar

AI Engineer | Agentic AI | LLMs | LangGraph | FastAPI | LLMOps |
Python | AI Automation
Faridabad, Haryana, India

Summary

I'm an AI Engineer and B.Tech student in Artificial Intelligence & Machine Learning with a passion for building intelligent systems that solve real-world problems. My current focus is on Agentic AI, LLM applications, and AI Automation. I enjoy designing AI workflows that go beyond simple chatbots—building autonomous agents, multi-step reasoning systems, and end-to-end AI applications using modern frameworks. What I work with Agentic AI & LLM Applications LangGraph & AI Workflows Python & FastAPI# LLMOps & AI Deployment AI Automation (n8n) Machine Learning & Data Science I enjoy turning ideas into production-ready applications by combining AI models with APIs, databases, automation tools, and modern backend technologies. Some of the projects I've built include AI chatbots with persistent memory, lead generation and qualification systems, AI automation workflows, and data science applications. I'm continuously exploring new ways to make AI systems more reliable, scalable, and useful. I'm currently looking for opportunities to collaborate on AI products, contribute to open-source projects, and connect with engineers, founders, and AI enthusiasts who are building the next generation of intelligent applications. Let's connect and build impactful AI solutions together.

Experience

The Sparks Foundation

Web Developer

January 2024 - March 2024 (3 months)

India

Oasis Infobyte

Java Developer

January 2024 - February 2024 (2 months)

Education

Guru Gobind Singh Indraprastha University
Btech, Artificial Intelligence · (2023)
